

VinylPlus® Supplier Certificate

ADDRESSED TO PVC ADDITIVES SUPPLIERS (STABILISERS, PLASTICISERS, FILLERS AND PIGMENTS) AND COMPOUNDERS

Helping customers meet the demand for transparency on sustainable production, by extending the sustainability certification scope of PVC products to the suppliers of additives and compounds.

VinylPlus® Supplier Certificates

The VinylPlus® Supplier Certificates aim at empowering the consumers to make **informed choices** about the additives and compounds they buy, while enabling converters to differentiate between raw materials based on their **environmental, social and energy credentials**.

Why apply to the VinylPlus® Supplier Certificates?

Showcase your **sustainability efforts**

Help your customers to gain **quicker access** to the VinylPlus® Product Label

Help customers meet the demand for **transparency on sustainable production**

Empower the converters to make **informed and sustainable choices**

Benefit from the **Certificates promotion** done by VinylPlus®

The methodology of the Supplier Certificates works on a system of credits dedicated to concrete actions performed on various areas and topics. Many sustainable development factors are addressed within the VinylPlus® Supplier Certificates:

VinylPlus® partnership and programme support

Organo-chlorine emissions

Organisational Management Requirements

Sustainable use of additives

Supply Chain Management Requirements

Sustainable Energy and Climate policies

Controlled Loop Management of Waste and Recycling

Sustainability Awareness and Communication
